Men's Social Detox and
Residential Support

Men's Social Detox and Residential Support

The Men's Facility provides social detox and residential support services. The facility is a safe and stable place to live that promotes treatment and recovery for men with a substance use disorder. Men are able to attend treatment and also obtain employment while in the program. Case managers and peer support specialists may assist individuals with seeking safe and sober living environments as they transition from the facility to home.

Men are screened for social detox or residential support services through an individual assessment process.
